Hydraulic Automatic Long Arm Barrier and Long Beam Barrier

(Product Code : MDR-LB-2500)

Our Systems are Ports, Oil Refineries, Stone Crushing and Separating Plants, Mine Fields, Dams, Power Plants etc. It is used in points. It is an indispensable product for entrances and exits where trucks , trailers and large construction machines work intensely. Our long arm beam barrier systems; They work with a hydraulic system. It can be manufactured in one piece up to 25 meters arm length.

Security measures are designed in the foreground, including photocell - loop detector - traffic light - hydraulic protection system, 4 pistons, 2 masters - 2 slaves.

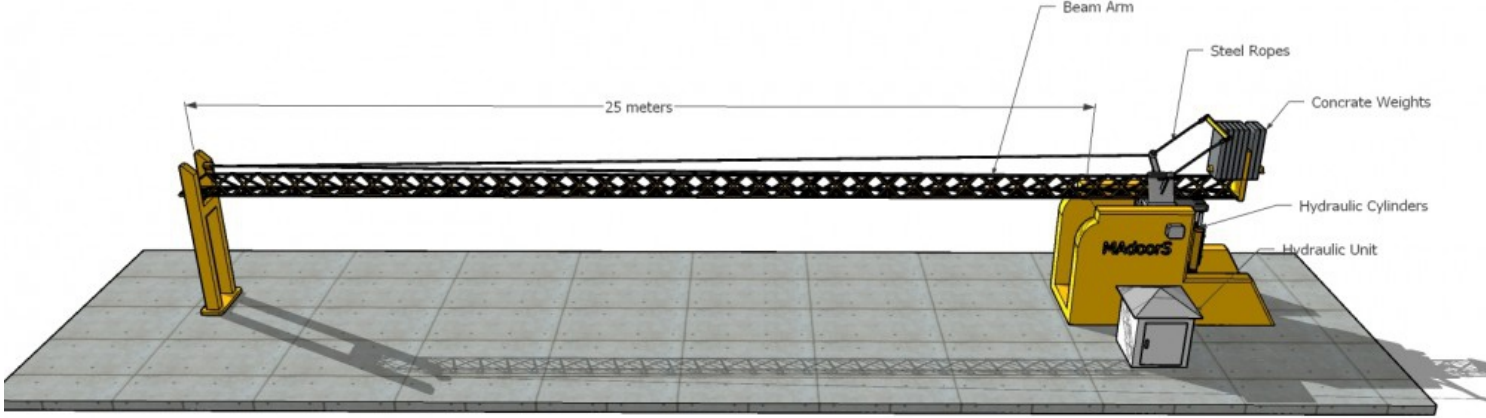

There is a lock system on the piston inlets and outlets to keep the opposite rod steady and prevent it from falling due to piston failure and hydraulic pipe oil leakage. 2 pistons active and 2 pistons work redundantly. This product, which is designed by our Madoors system
